Subject: Biosolids Disposal Table
Attachments: EPA CA Biosolids Disposal Table 1-2014.xlsx; AB 371 Salas Amended Passed 1-30-2014.pdf

Hello Lauren, CalEPA folks asked me to explain how to read the Biosolids Disposal Table (see attachment), so they could explain it in a letter. E.g. what are the units? Are columns I-T showing where disposal happened period, or just Class B disposal? I'm not sure what column H (DMT?) means. What's the difference between land application and surface disposal? Etc. Can you help? I need asap, if possible.

By the way, we had an interesting town hall meeting down in Bakersfield last week. Assemblyman Salas called the town meeting to discuss the potential impact of the City of LA land application of biosolids at the Green Acre facility. Lots of local news media coverage. See link below:
<http://www.kerngoldenempire.com/news/local/story/town-hall-meeting-on-sewage-sludge/d/news/local/story/oaJ3yUpqe0y2yozG1lbNyg>

Also, see amended AB 371 (attached).
Thanks,
Johnny g.
